

# Preliminary Results

*Group 1*

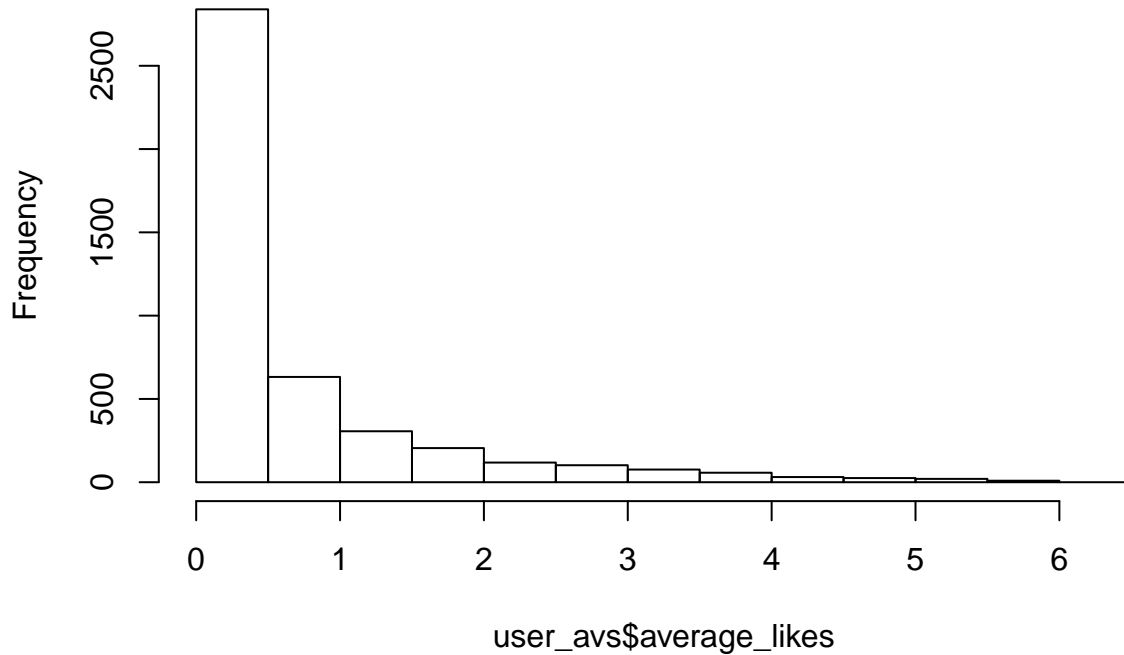

*April 25, 2016*

The data in this document were pulled from a database on April 25 2016 at 19:24. As like and tweet data is collected on a rolling basis, not all likes and tweets made up to that time are included.

## Descriptive Statistics

variable	mean	minimum	maximum
average_keywords	2.5890366	0	51.708333
average_likes	0.6886406	0	5.791667
average_MAGA	0.2364253	0	38.958333
average_mentions	1.2481995	0	51.666667
average_rts	0.5004431	0	20.791667
followers_count	120.0947964	0	988.000000
friends_count	216.1613122	0	3010.000000

## Histogram of user\_avs\$average\_likes

We measure likes of trump tweets on each day, compare treatment and control groups, and show the fraction of the treatment group receiving treatment on each day.
